

Why Weld It, When You Can Stack It?

GENSTAX

GENERATOR STACK MADE EASY

Stack it, Clamp it, Forget it.

GENSTAX's proprietary male-female joint design allows for quick and easy connection in a fraction of the time it takes to weld.

WHY GENSTAX?

- Lowers Installation Costs
- Saves Time
- Reduces Risk & Headaches
- Design, Application & Training Support

Assemble a Durable System in Three Easy Steps.

1 Apply Sealant

2 Connect Parts

3 Secure Assembly Band

Quick Assembly. Superior Quality.

GENSTAX is a premium factory-built modular system designed to efficiently exhaust generator by-products. Its extended inner flange ensures fast assembly and a secure, pressure-tight seal. The double-wall construction, insulated with 2" of high-performance mineral fiber, delivers optimal thermal efficiency. Crafted from top-grade stainless steel that's plasma welded, the inner flue provides superior durability and long-lasting performance.

PRODUCT SPECS.	
Available Sizes	5" - 10" Diameters
Available Materials	304 Inner Wall, 304 Outer Wall
Relief Valve (RV)	Not Required on Diesel Generators (5" -10")
Variable Lengths	Approved For Use Indoors

Why GENSTAX?

Lowest Installation Costs

Faster installation reduces labor hours and minimizes the need for expensive onsite fabrication, which also cuts down on equipment and material waste.

Saves Time

With prefabricated components, the installation process is streamlined, shortening project timelines and avoiding delays with complex onsite work.

Reduces Risk & Headaches

Factory-built parts reduce the likelihood of errors and design issues, minimizing costly reworks or project delays.

Design, Application & Training Support

Expert guidance through the design phase, application support, and training streamlines the process and ensures your project runs smoothly from start to finish.

Benefits *far outweigh* Welded Steel:

	GENSTAX Recommended	Welded Steel
