COMMERCIAL ON AIR

Happy New Year! I hope each of you and your families had a wonderful holiday season and are as excited about 2024 as we are! A new year means that the AHR show is almost upon us. Our Duravent Group team has been hard at work to ensure that this year's show will be as successful as ever and we are looking forward to seeing you there. One of the AHR Highlights is the annual cocktail reception at our booth late afternoon on Monday. Don't miss it – this event has grown exponentially since its inception in 2018.

A new year also means an opportunity to explore new methods of doing things and to challenge the status quo. One approach that we continue to have success with is working with contractors to develop innovative solutions for our prefab grease duct, as highlighted in our project spotlight below.

We are also increasing the number of projects that are putting to use our ability to customize the exterior appearance of our pressure stack product. Additionally, for a relatively low-cost, we can custom powder coat your system to make it more architecturally friendly, something unique to us in the industry.

I can't wait to see those of you who will be in Chicago. Each year AHR is another wonderful reminder how fortunate we are to have so many great business partners within the Duravent Group family.

Sincerely,

Scott K. Smith
Vice President of Commercial Sales

DURAVENT GROUP GREASE DUCT SALT LAKE CITY, UTAH

It's a common misconception that once an installer chooses rectangular or round duct, they must stick with that choice throughout the entire run. However, round grease duct doesn't always fit the constraints within some buildings, particularly on horizontal runs. At the Joseph Smith Memorial building in Salt Lake City, the Duravent Group team worked on a "hybrid" exhaust installation. Rectangular field-welded duct was used as needed, and then transitioned to Duravent Group factory-built round duct where possible so that the installer could realize the benefits of our UL-listed system. Duravent Group Design Services Director, Mike Heavener, worked very closely with the contractor to coordinate the creation of the square to round transitions. It is important to note that it is vital for the contractor to keep custom work in their scope to help hold the overall cost down. Check out the Joseph Smith Memorial project video and learn more more about Duravent's prefabricated grease duct in the links below!

SEE YOU IN CHICAGO! AHR EXPO 2024

It's that time of year again! The AHR Expo comes to the windy city this year and your Duravent Group team will be ready and waiting at **Booth S7731!** The Duravent Group booth will be showcasing the trusted brands you love:

AMPCO and Selkirk by Duravent's custom venting solutions can be tailored to your unique application requirements. The engineering staff provides complete design services that take the "guesswork" out of installation even for the most complex systems. You will find a broad range of venting and components to fit a wide array of interior and exterior commercial applications and customer specifications.

- Boilers
- Pizza Ovens
- Brew Kettles
- Coffee Roasters
- Kitchen Grease Ducts
- And More!
